

CALCULATING WEIGHT FOR _____

BODY LENGTH

Measure from the point of the shoulder to the point of the buttock in inches.

HEART GIRTH

Measure the circumference of the horse's body behind the elbow in inches.

CALCULATE

Bodyweight in pounds can be estimated with the following formula, with space to fill in your measurements:

Heart Girth () x Heart Girth () x Body Length ()
330

SUBMITTING FOR ANALYSIS

When submitting measurements to Kindred Beasties for nutrition consultation, we only require the measurements for body length and heart girth in inches and use multiple formulas to calculate an average approximate weight.
